

DON'T LET COVID-19 WRECK YOUR FUN IN THE SUN

Keep your time here on the beautiful Emerald Coast happy and healthy by following these tips to reduce your risk getting sick during your stay.

Regular handwashing is the most important step you can take to reduce infection risk. Wash hands with soap and warm water for at least 20 seconds before eating, after using the restroom and after coming in contact with others or high-touch surfaces.

Whether inside or outside, social distancing is essential to prevent the spread of the virus. Avoid crowds and keep a distance of 6 feet between yourself and others.

Social distancing is not always possible, especially in places such as grocery stores or restaurants. When unable to maintain a distance of 6 feet between yourself and others, utilize protection such as a mask or other face covering.

Despite taking the above steps, illnesses sometimes happen. In the case that you becomes sick, isolate yourself in a separate space from the rest of your group to reduce the risk of further spread.

SICK ON VACATION?

What You Should Do

If you begin to experience flu-like or respiratory illness including but not limited to fever, cough and shortness of breath, take these steps to help prevent potential spread of illness and get the care you need.

Isolate Yourself

Separate yourself from others as much as possible. Allow no contact with those who are at high-risk for complications and minimal contact with those at normal risk.

Contact Management

Let the lodging manager or front desk staff know you are experiencing symptoms. They will inform you on how to proceed with the rest of your stay.

Visit A Doctor

Contact White-Wilson Immediate Care Clinics for testing and care. If you are experiencing severe symptoms, proceed to the closest emergency room or call 9-1-1.
